

1997 Stumpage Prices by Maine County

Compiled from 1997 Landowner Reports
pursuant to title 12 MRSA §8885

published: July 1998

Maine Forest Service
SHS#22 Augusta, Maine 04333
(207)287-2791 or instate 1-800-367-0223

Printed under appropriation # 010-04A-5400-552

☐ The market values listed in this report represent prices paid to Maine landowners in 1997.

☐ Current prices will likely vary.

☐ See ***Factors Influencing Stumpage Prices of Forest Products*** on the inside front cover.

☐ Contact your **Maine Forest Service Forester** for more detailed information;

☐ Call **1-800-367-0223** to find the phone number of your **Maine Forest Service Forester**.

What is in this report?

This report lists the stumpage prices paid to Maine woodland owners during the calendar year 1997.

How was this information collected? The Maine Forest Service (MFS) collects information on timber harvesting through notification and landowner reporting. The price information contained in this report is based on the 1997 landowner reports.

What is the purpose of the Annual Landowner Reports?

Each year, the *Maine Forest Service* collects information from *forest landowners* regarding the stumpage prices, volumes of timber harvested, and harvest acreage in Maine.

This ***confidential*** information is used for three primary purposes:

- to calculate valuations for lands enrolled in the *Tree Grow Tax Program*,
- to calculate and publish stumpage price descriptive statistics, in a format which maintains landowner confidentiality, and
- to quantify harvest area and forest management techniques.

This report is arranged so that you can look up stumpage prices by county. Maine's sixteen counties are listed alphabetically followed by a state summary. The information provided for each county is organized into eight ***product*** sections: Sawlogs, Veneer, Boltwood, Pulpwood, Studwood, Palletwood, Firewood, & Biomass Fuelwood. The price statistics are average, minimum, maximum, and the number of reports used to calculate the average. The statistics appear by product and species for each county.

FACTORS INFLUENCING STUMPAGE PRICES of FOREST PRODUCTS

Stumpage prices are influenced by a number of factors including but not limited to the following:

1. Percentage of the timber species in the area
2. Volume to be cut per acre
3. Size of average tree to be cut
4. Timber quality
5. Logging terrain
6. Distance to public roads
7. Type of logging equipment
8. Season of year
9. Woods labor cost
10. Landowner needs or special requirements
11. Capital gains aspects of Internal Revenue Code
12. Market demand
13. Distance to market
14. Property taxes
15. End product of manufacture
16. Landowner knowledge of market value
17. Sale by competitive bid
18. Type of harvest; i.e., partial or clear-cut
19. Regulatory constraints

Any one of the above factors can have a significant effect on stumpage prices for a species, while another factor may have an insignificant effect in a particular area.

Definitions and Notes

- **Average.** The average price (or mean) is calculated by summing the stumpage prices reported by woodland owners and dividing by the number of prices. This is the arithmetical mean.
- **Biomass.** Above ground portion of tree that is chipped on site. Usually the whole tree but sometimes only the tops and branches.
- **Cords. (cds).** (MFS Rules Chapter 20 Definition). A cord is a unit of measure of wood products 4 feet wide, 4 feet high, and 8 feet long, or its equivalent, containing 128 cubic feet when the wood is ranked and well stowed. Any voids that will accommodate a stick, log or bolt of average dimensions to those in the pile shall be deducted from the measured volume.
- **Max(imum).** The maximum price is the highest price reported (edited to remove errors).
- **(Mbf).** One thousand board feet. One (board foot) is a piece of wood *1" thick by 12" long by 12" wide*.
- **Min(imum).** The minimum price is the lowest price reported (edited to remove errors).
- **Pulpwood.** Though reported in three different units (cords, tons, and lbs.), this report uses only cords as the common denominator. For conversions, contact the Maine Forest Service.
- **Reports(Rpts).** The number of reports upon which the statistics were calculated. IF there were three or fewer reports for a product and species in one county, the price statistics are not reported at the county level (to preserve confidentiality). There may be a statewide price however.

- Stumpage. Stumpage means standing trees. [MFS Rules Chapter 20 Definition]
